

INSTRUCTIONS: Latitude/Longitude coordinates in decimal degrees with Google Maps.

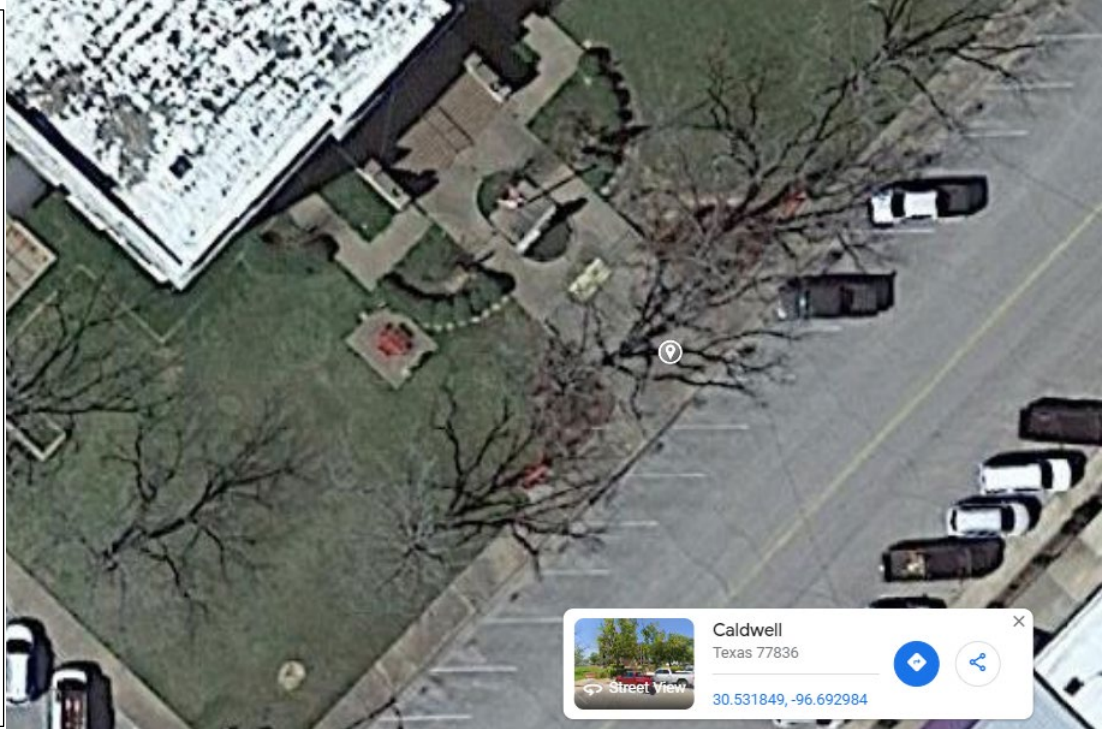

This is for informational purposes only. **Google Maps cannot be used to assign or verify your 911 address.**

Visit google.com/maps

Click the layers box in the lower left corner to view satellite imagery.

Navigate to your property and zoom in to driveway location for your property.

Click on the map at the center of your driveway where it meets the named road.

A box will pop up at the bottom of the screen.

These are the coordinates you will enter on the form for the latitude and longitude.
